Figure S1. Oxymatrine suppresses the expression of MMP-2/-9 and activity of p38 signaling pathway in HepG2 and SMMC77211 cells.

HepG2 and SMMC77211 cells were treated with oxymatrine for 24 h or not, and then detected with western blotting to analyze the protein levels of MMP-2/-9, p38 and p-p38. (A) The protein levels of MMP-2, MMP-9, p38 and p-p38 in HepG2 and SMMC77211 cells. (B) Quantification of the protein levels of MMP-2, MMP-9, p38 and p-p38 in HepG2 and SMMC77211 cells. Values represent the means ± SD of three independent experiments performed in triplicate. *p < 0.05 vs control group.
