

Supplementary Figure legends

Figure S1. Effect of miR-216b-5p up-regulation on TPT1 and SOX4 protein expression in Bxpc-3 and SW1990 cells. (A and B) Bxpc-3 and SW1990 cells were transfected with the miR-216b-5p expression plasmid (miR-216b-5p) or scrambled miRNA expression plasmid (NC). Western blot was used to determine the TPT1 and SOX4 protein expression. The experiments were independently repeated three times. **, $P < 0.01$.
