

### Supplementary Figure. 1

KPNB1 mRNA expression levels in lung adenocarcinoma cell lines and small airway epithelial cell (SAEC) cell lines (rpkm). Rpkm is the abbreviation for “reads per kilobase per million.”

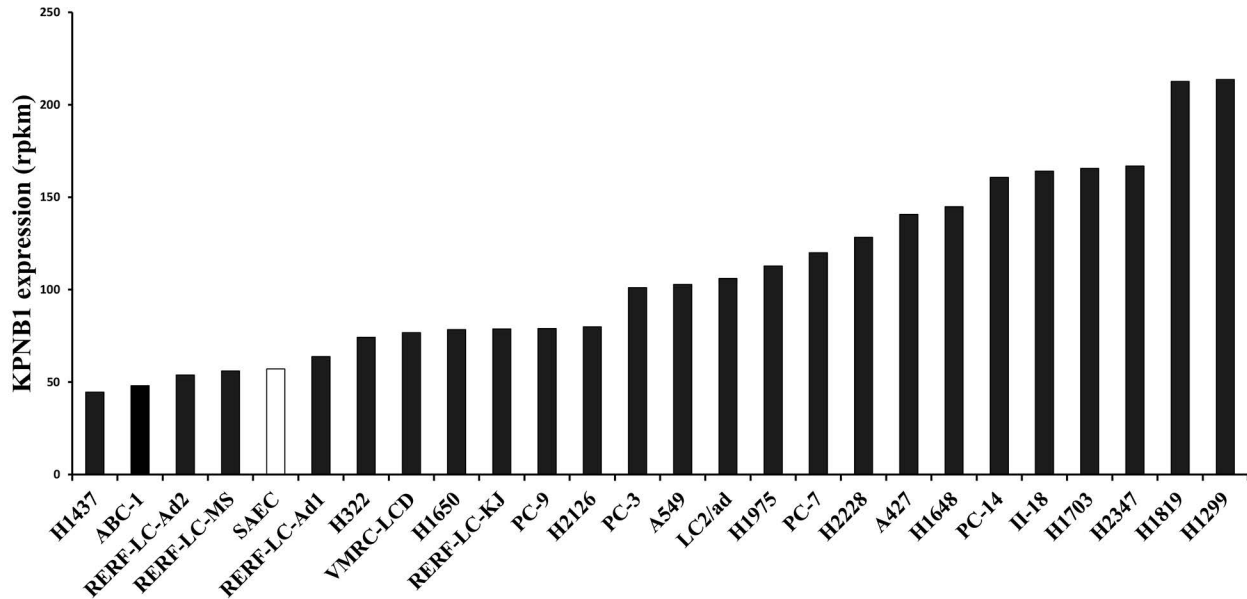

### Supplementary Figure. 2

The correlation between PLK1 and KPNB1 expression levels of 230 resected lung adenocarcinomas. The data was acquired from the database of The Cancer Genome Atlas (TCGA) (<https://cancergenome.nih.gov/>) and visualized by cBioPortal (<http://www.cbioportal.org/index.do>).

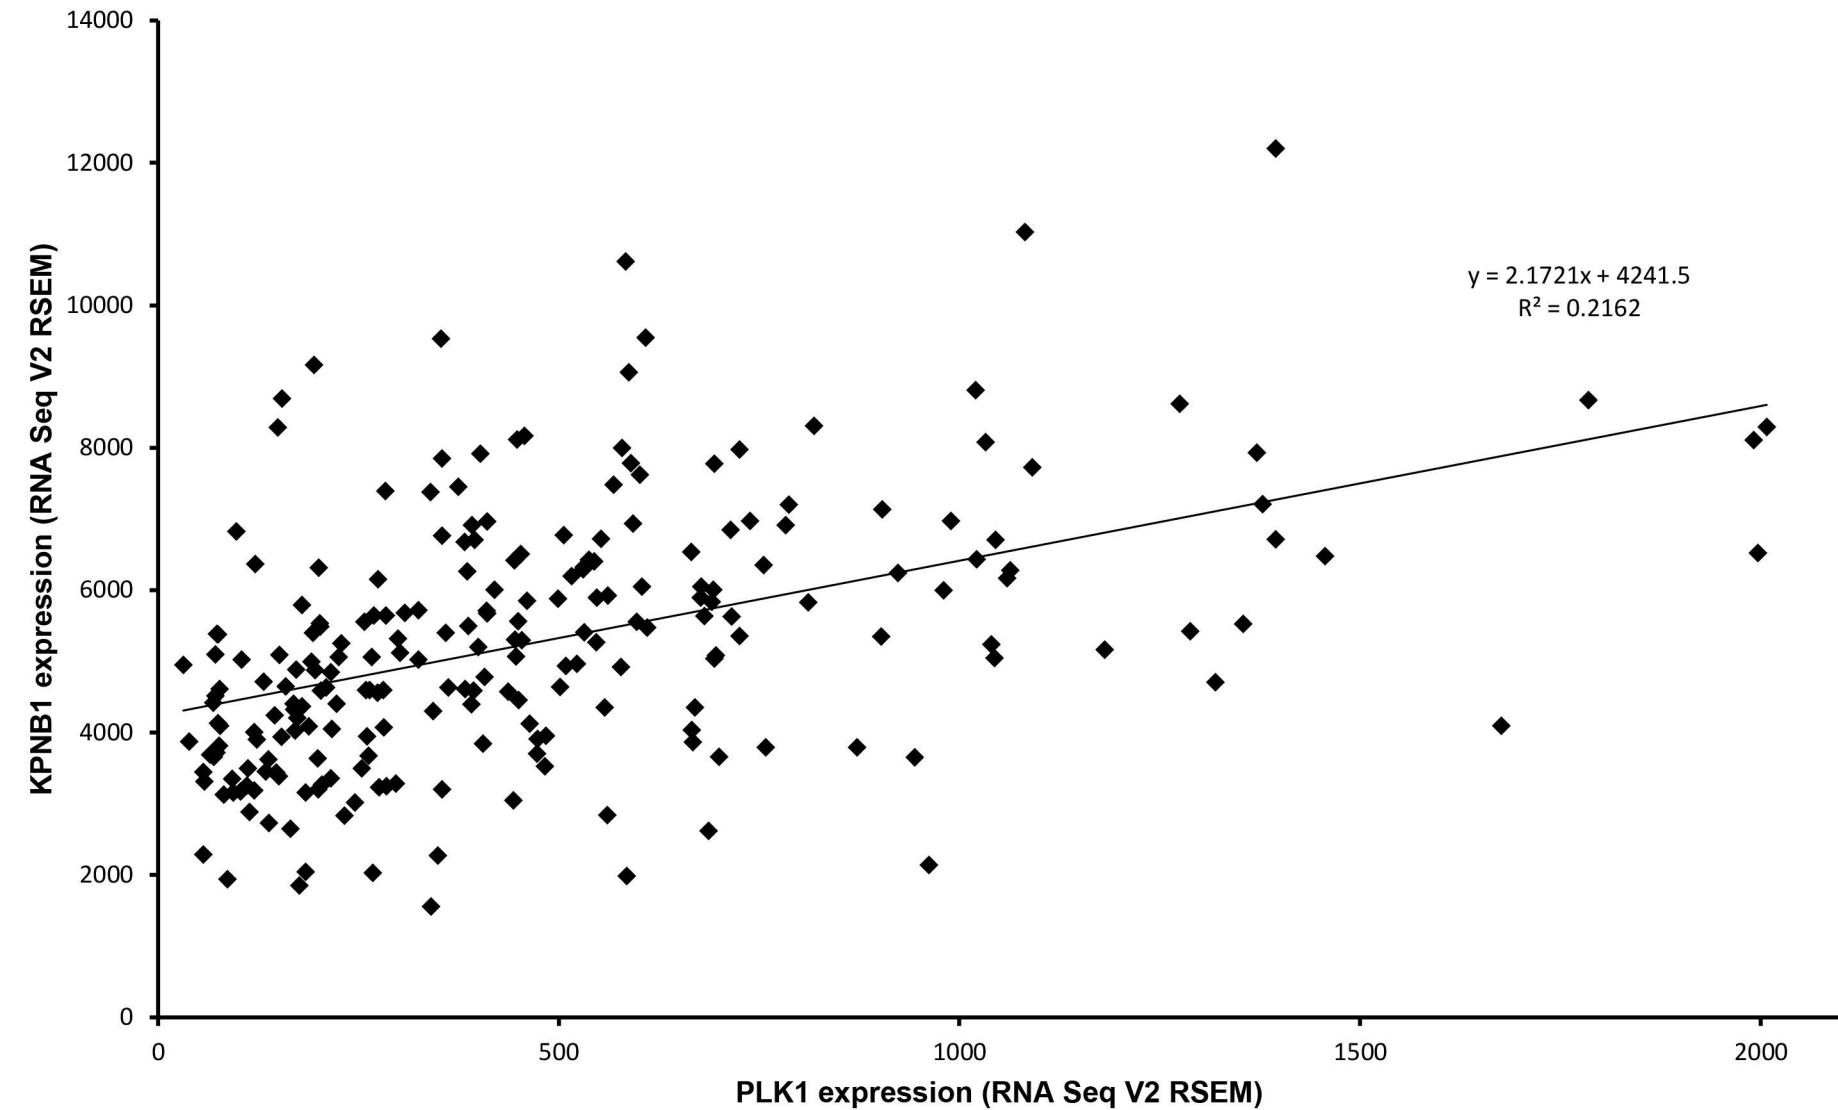

### Supplementary Figure. 3

The number of H1299 cells was counted 24, 48, and 72 hours after the addition of BI2536. Error bars represent standard deviations.
