Table S5. Univariate and Multivariate analyses of prognostic factors or disease-free survival in pMMR patients.

Fig. S1

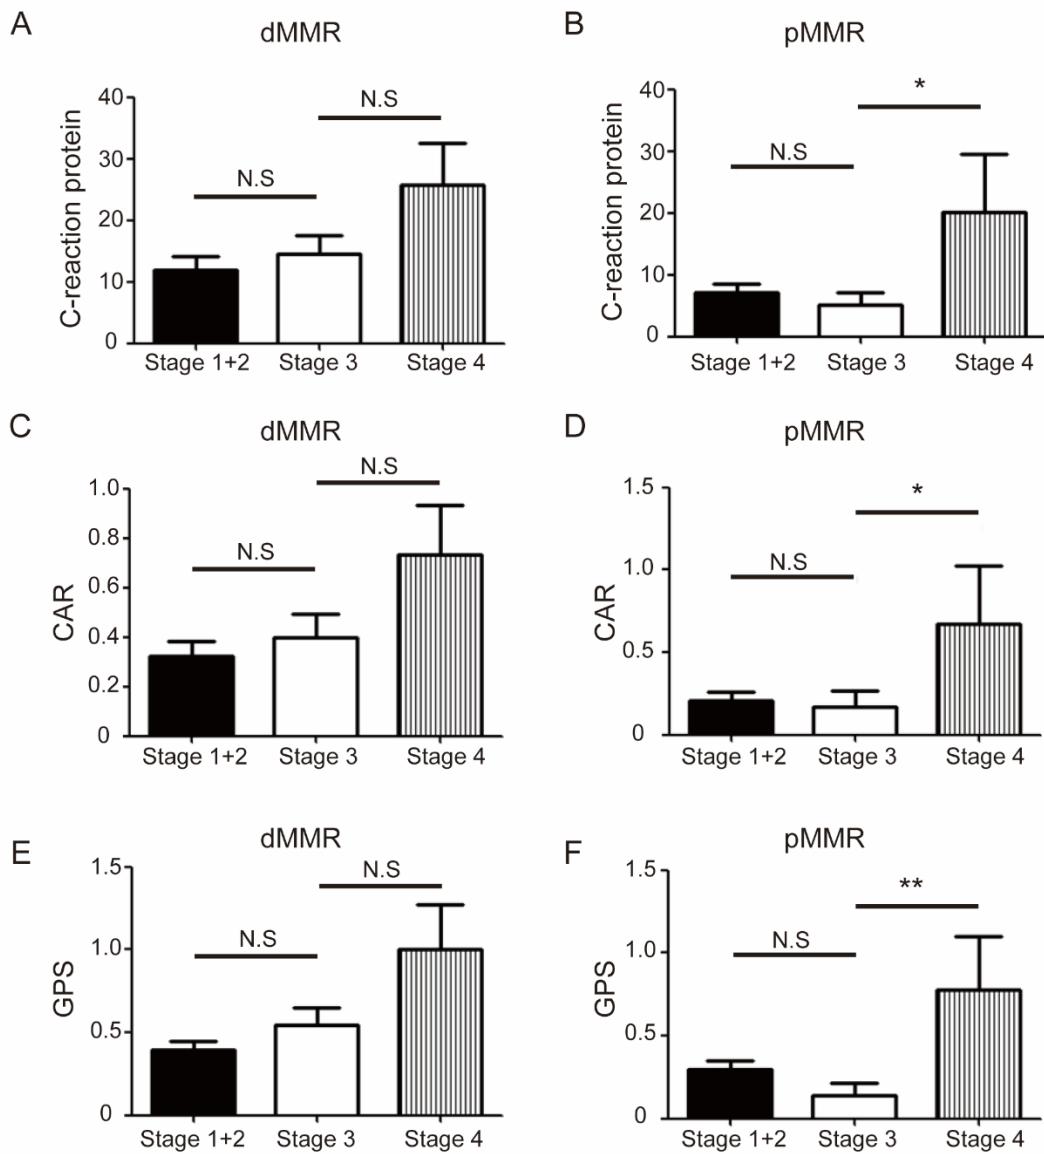

The representative results of IHC staining of MMR proteins. (A) MLH1 negative (200 \times); (B) MLH1 positive (200 \times); (C) MSH2 negative (200 \times); (D) MSH2 positive (200 \times); (E) MSH6 negative (200 \times); (F) MSH6 positive (200 \times); (G) PMS2 negative (200 \times); (H) PMS2 positive (200 \times).

Fig. S2

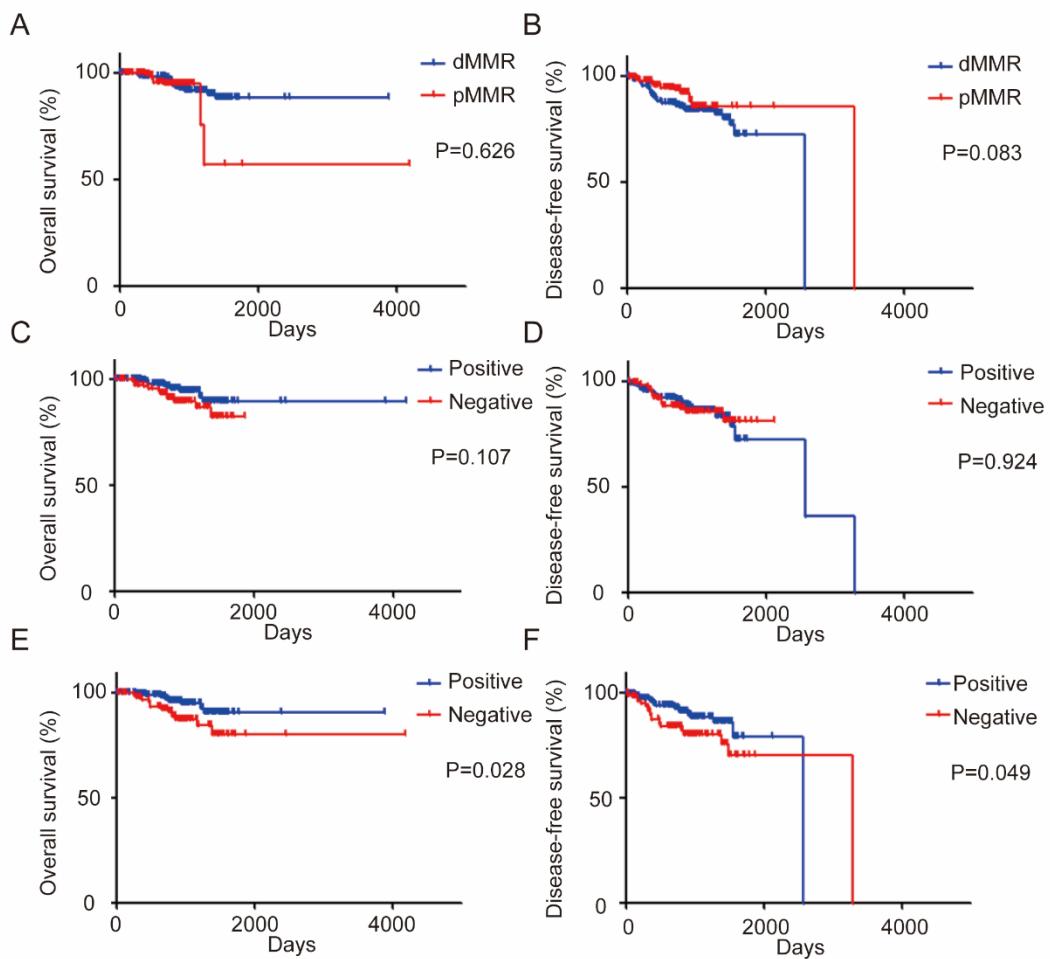

The representative results of IHC staining of PD-1 and PD-L1. (A) PD-1 negative (100 \times); (B) PD-1 negative (200 \times); (C) PD-1 positive (100 \times); (D) PD-1 positive (200 \times); (E) PD-L1 negative (100 \times); (F) PD-L1 negative (200 \times); (G) PD-L1 positive (100 \times); (H) PD-L1 positive (200 \times).

Fig. S3

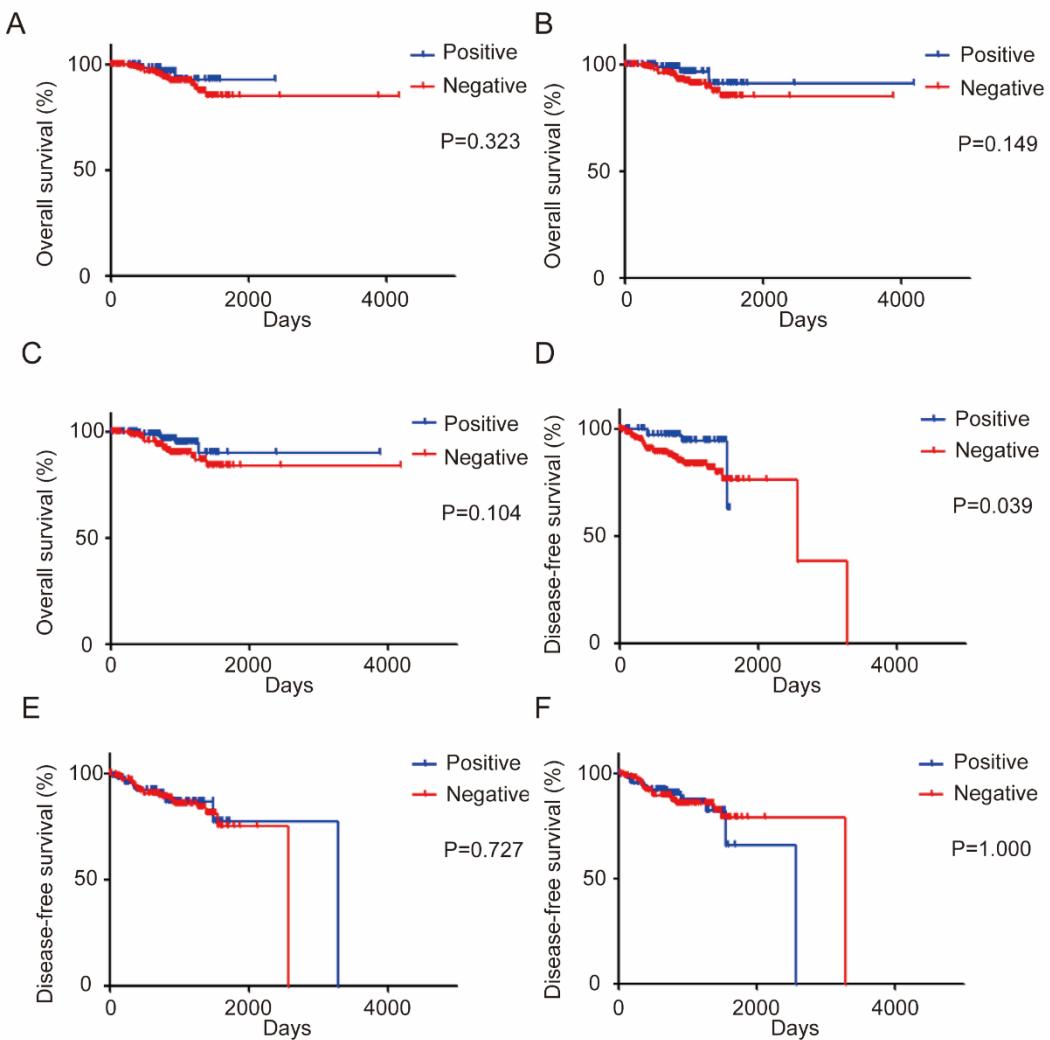

Inflammatory status difference between dMMR and pMMR CRC patients. (A-B). Group comparison combined the level of circulating serum C-reaction protein and AJCC stages in dMMR (A) or pMMR patients (B). (C-D) Group comparison combined the level of CAR and AJCC stages in dMMR (C) or pMMR patients (D). (E-F). Group comparison combined the level of GPS status and AJCC stages in dMMR (E) or pMMR patients (F). * P<0.05, ** P<0.01, N.S, not significant.

Fig. S4

Different association of PD-1 and PD-L1 expression with survival between dMMR and pMMR CRC patients. (A-B). Kaplan-Meier survival curves comparing the overall survival (A), and the disease-free survival (B) of the CRC patients with different MMR status. (C-D) Kaplan-Meier survival curves comparing the overall survival (C) and the disease-free survival (D) of the level of total PD-1 expression in CRC patients. (E-F). Kaplan-Meier survival curves comparing the overall survival(E) and the disease-free survival (F) of the level of total PD-L1 in CRC patients. * P<0.05, ** P<0.01, N.S, not significant.

Fig. S5

PD-1 expression at different locations are differently associated with CRC patient survival. (A-C). Kaplan-Meier survival curves comparing the overall survival of the level of tumor PD-1 (A), stroma PD-1 (B), or TIL PD-1 (C) expression in CRC patients. (d-f). Kaplan-Meier survival curves comparing the disease-free survival of the level of tumor PD-1 (D), stroma PD-1 (E), or TIL PD-1 expression (F) in CRC patients.
