

Supplementary Material

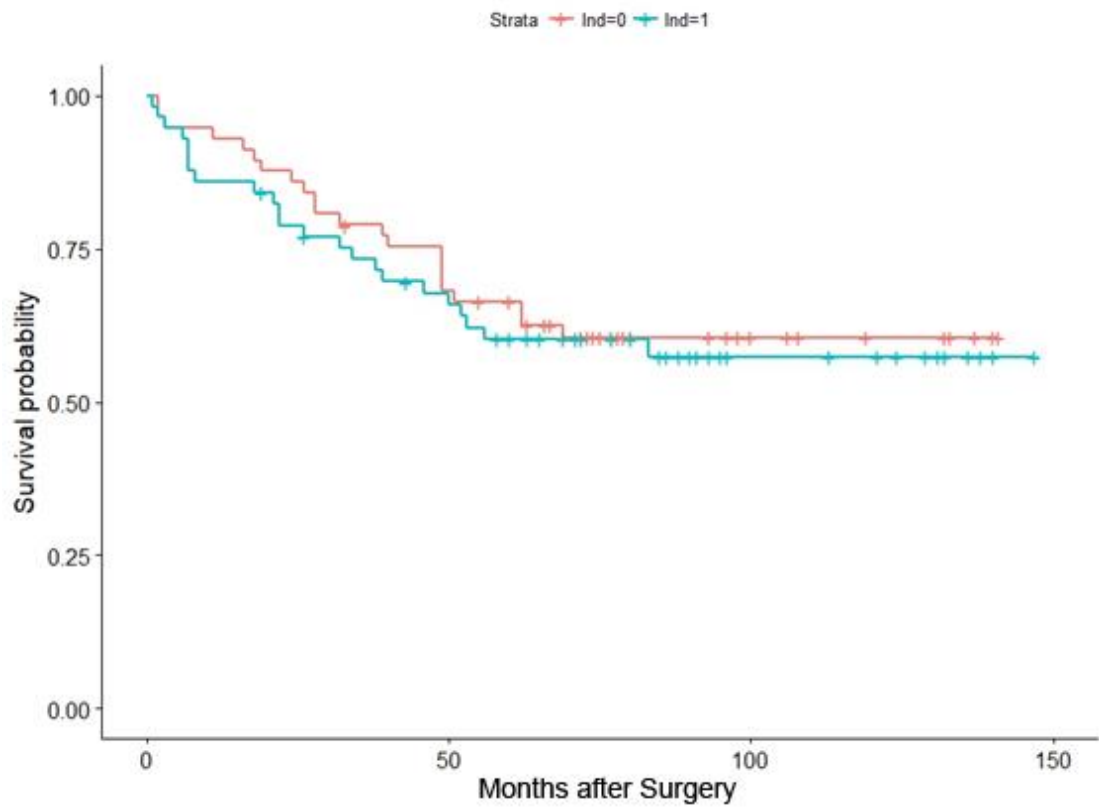

Figure S1: Association of LND with PFS among the subset of the 56 pT3pM0 propensity score-matched pairs. The unit of time(x-axis) is month.

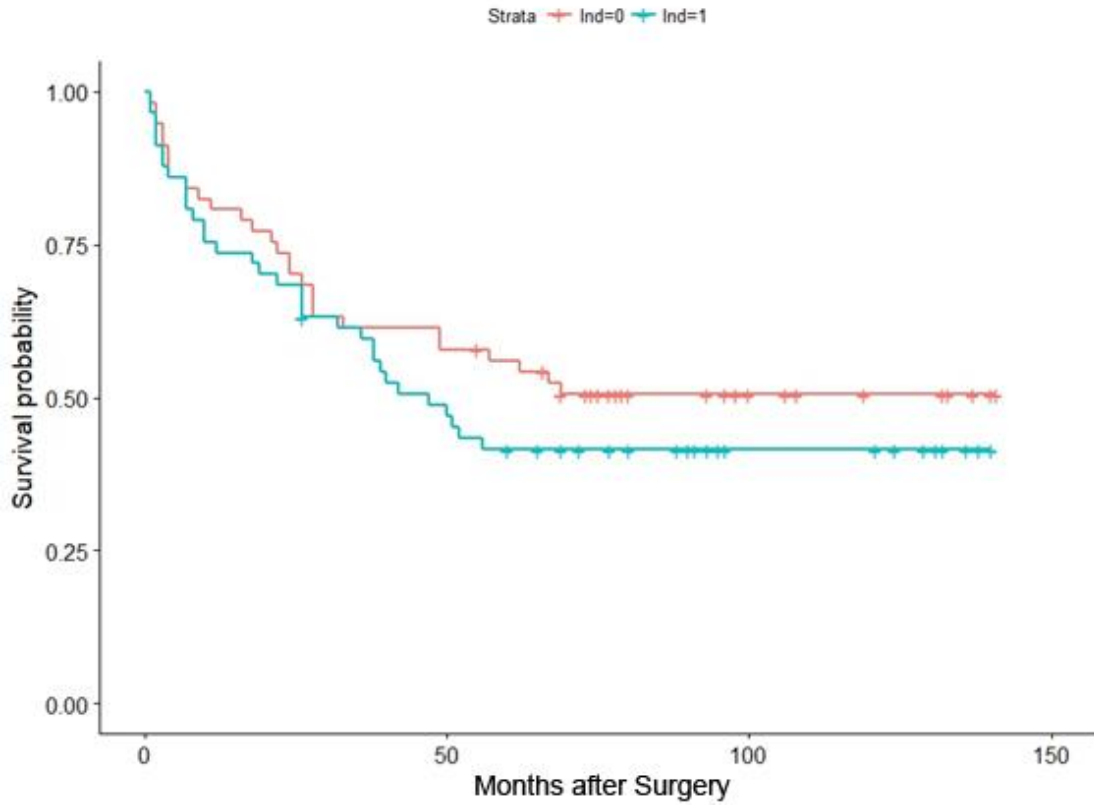

Figure S2: Association of LND with CSS among the subset of the 56 pT3pM0 propensity score-matched pairs. The unit of time(x-axis) is month.

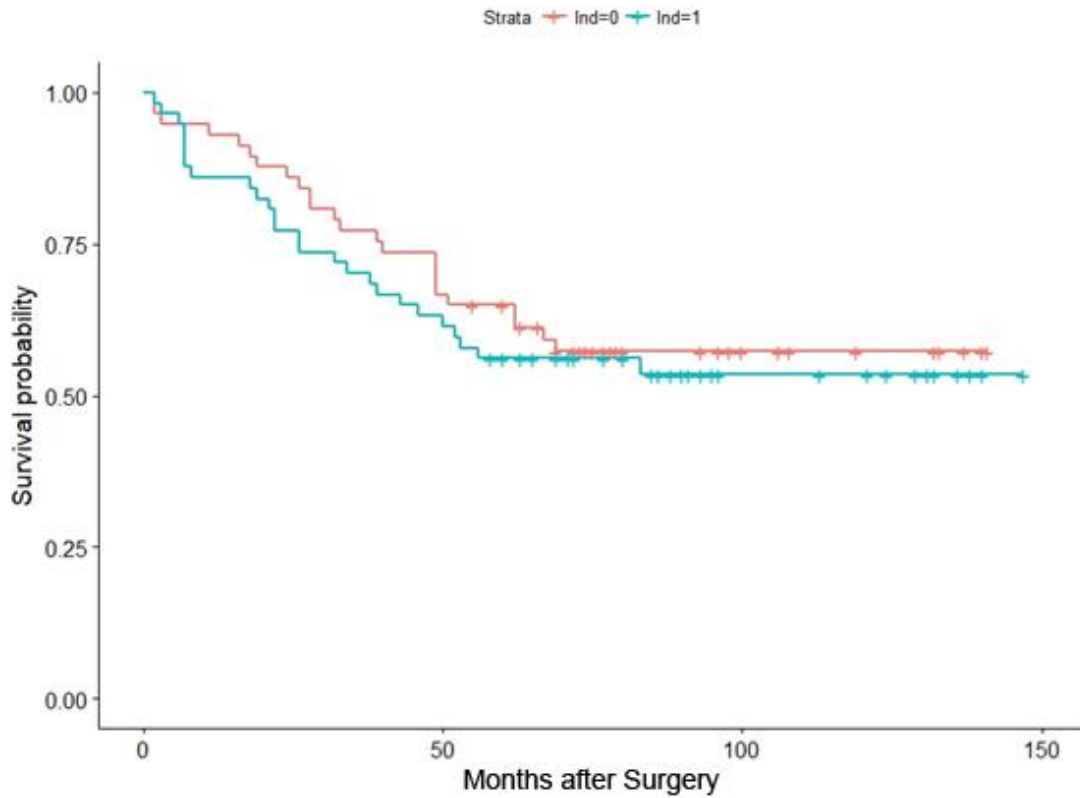

Figure S3: Association of LND with OS among the subset of the 56 pT3pM0 propensity score-matched pairs. The unit of time(x-axis) is month.

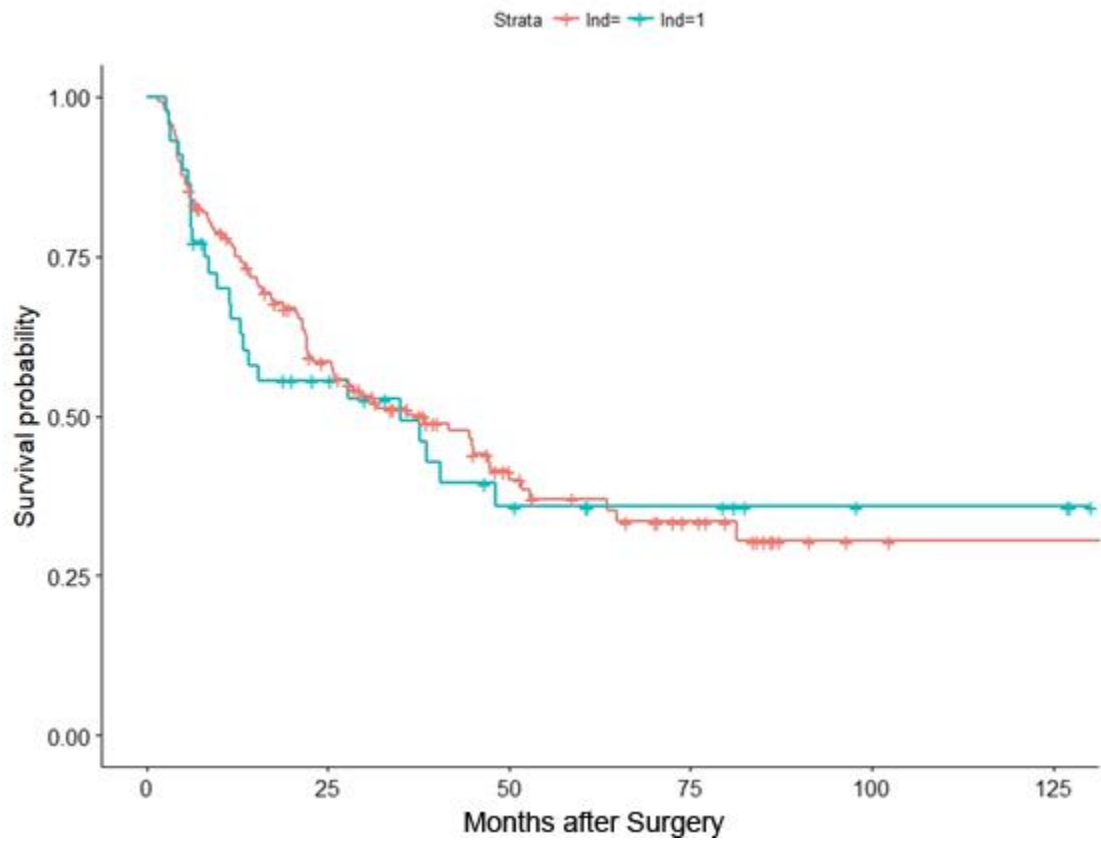

Figure S4: Association of LND with PFS among the subset of renal cell carcinoma with inferior vena cava tumor thrombus patients. The unit of time(x-axis) is month.

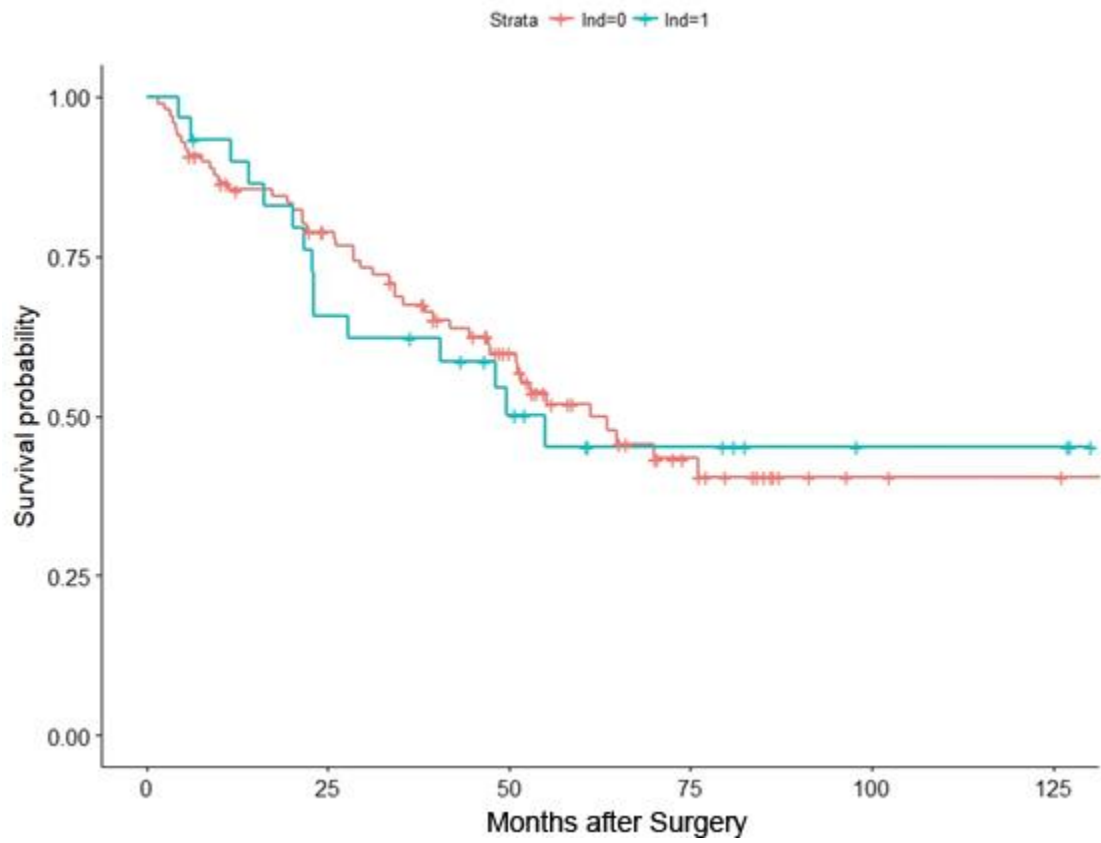

Figure S5: Association of LND with OS among the subset of renal cell carcinoma with inferior vena cava tumor thrombus patients. The unit of time(x-axis) is month.

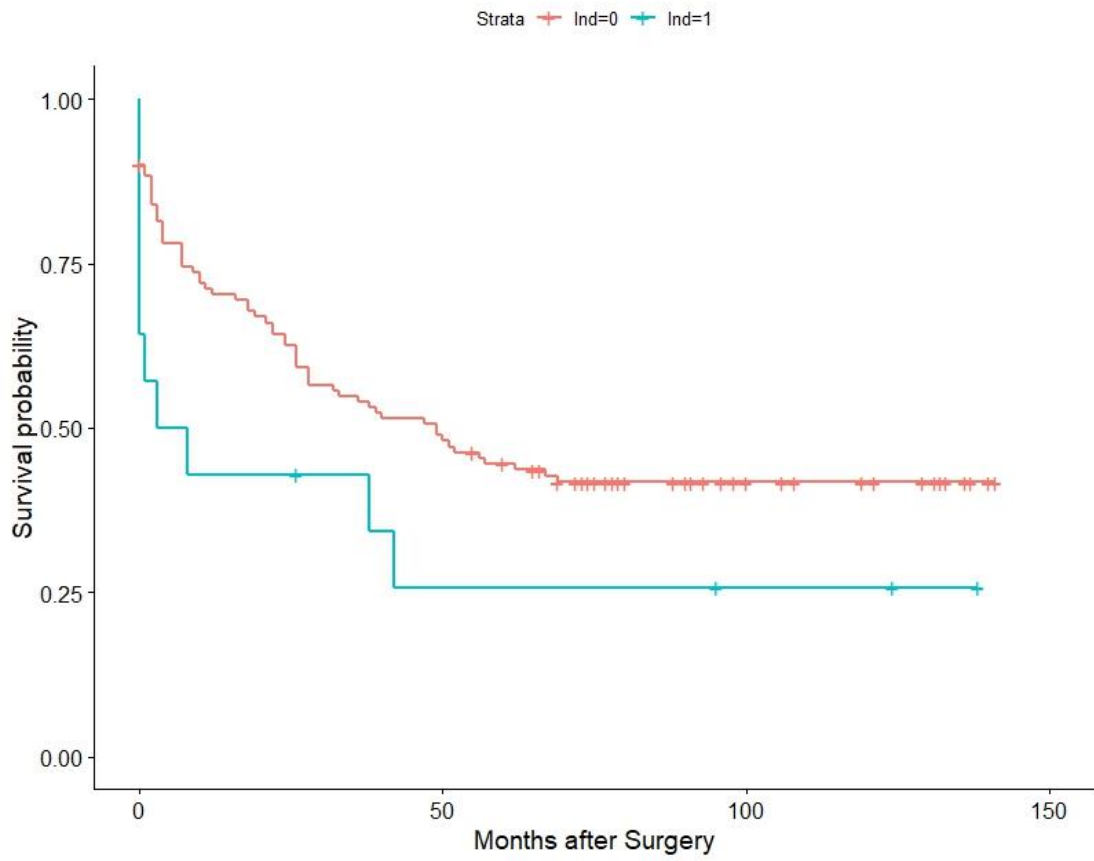

Figure S6: Association of LND with PFS among the subset of the Ind extend group(LND number \geq 5) and the normal Ind group(LND number $<$ 5).

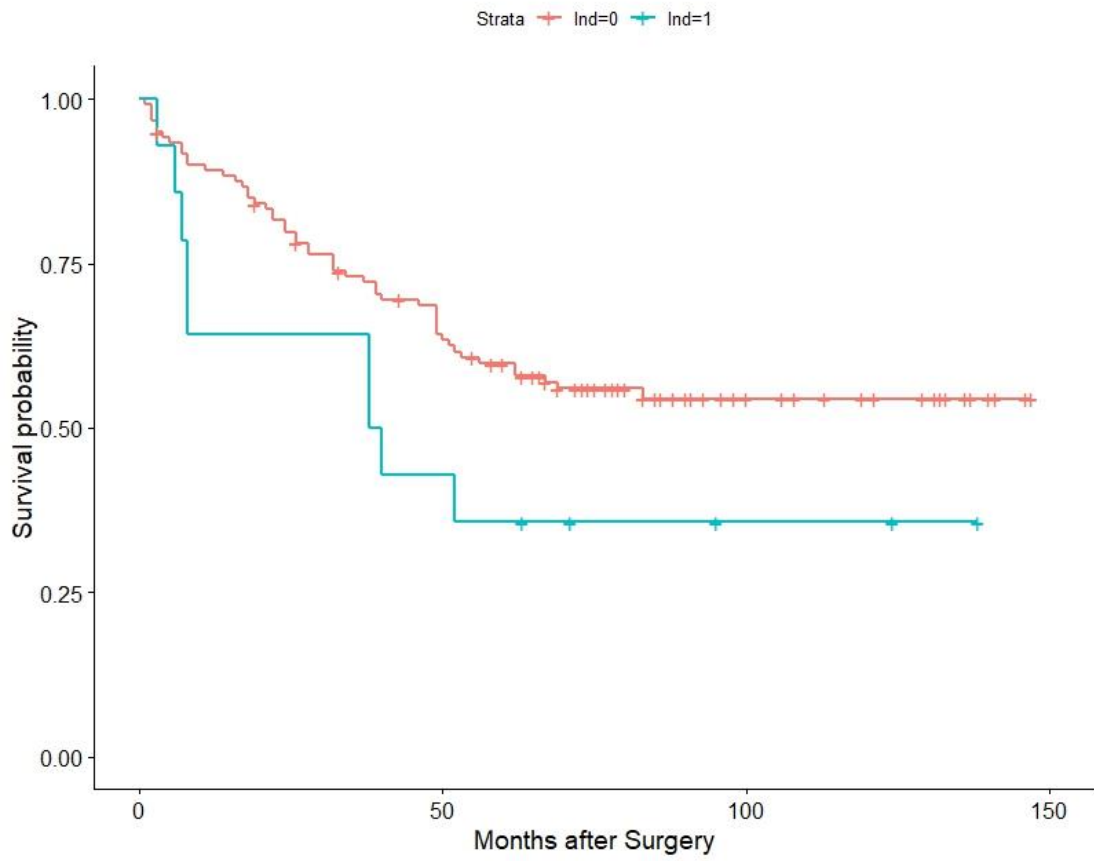

Figure S7: Association of LND with CSS among the subset of the Ind extend group(LND number \geq 5) and the normal Ind group(LND number $<$ 5).
