

Figure S1. Screening of cell lines prone to PNI. (A) The other two EC cell lines HEC-1A and KLE were also cocultured with DRG at day 2. The interaction of nerve and cancer cells were not observed (50× magnification). (B) PNI in cervical cancer cell line HeLa as positive control. Pan-cytokeratin (pan-CK), green (100× magnification), scale bar, 50μm.
