

Table S1. Effect of MDT on overall survival of subgroups with statistical differences

	Variables	P-value
Tumor Invasion	T1+T2	0.662
	T3	0.775
	T4	<0.001 <sup>a</sup>
Tumor Stage	Stage III	0.085
	Stage IV	0.005 <sup>a</sup>

Effect of MDT on overall survival was analyzed by Kaplan-Meier method and Log-rank test.

MDT: multidisciplinary team.

a:  $p < 0.05$  as statistical significance
