

Supplemental 1. The detailed profile of platelet index in our study cohort. (A) PLT (range: 57~689 $\times 10^9/L$; mean: 223.45 \pm 69.31 $\times 10^9/L$); (B) MPV (range: 6.2~20.5fL; mean: 10.01 \pm 1.4fL); (C) PDW (range: 7.9~23.1fL; mean: 13.57 \pm 2.78fL).

Supplemental 2. Optimal cut-off values were 285 $\times 10^9/L$, 9.45fL, 10.95fL for PLT, MPV, and PDW respectively. (A) ROC curve for PLT; (B) ROC curve for MPV; (C) ROC curve for PDW.
