

Supplementary Data

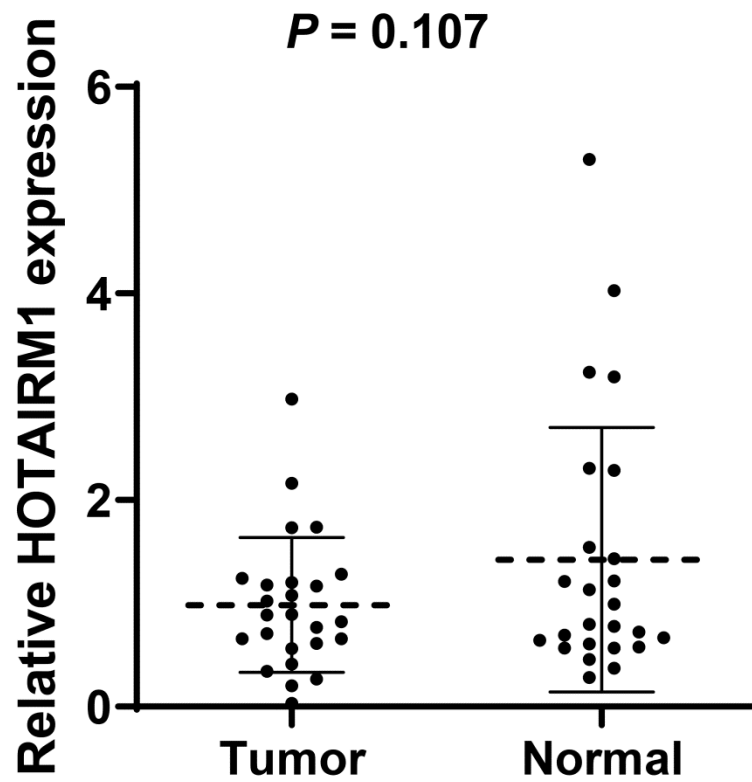

Figure S1 qRT-PCR analysis of HOTAIRM1 expression in gastric cancer and normal tissues (n =25).

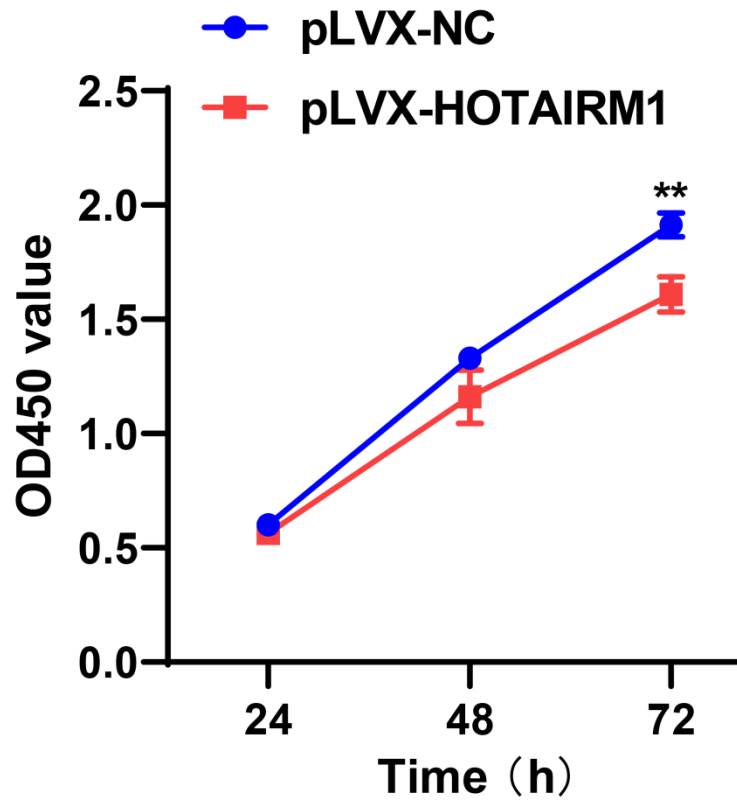

Figure S2 The CCK-8 assay results showing the effect of HOTAIRM1 overexpression on the proliferation of AGS cells.

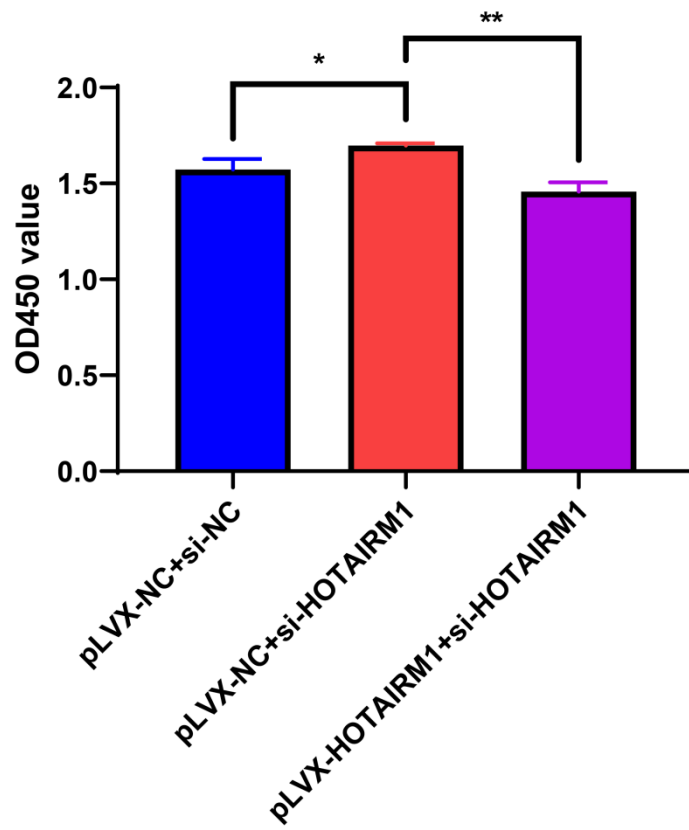

Figure S3 Cell proliferation was measured by CCK-8 assay. BGC832 cells were transfected with si-HOTAIRM1-1 and pLVX-HOTAIRM1 for 48 h.
