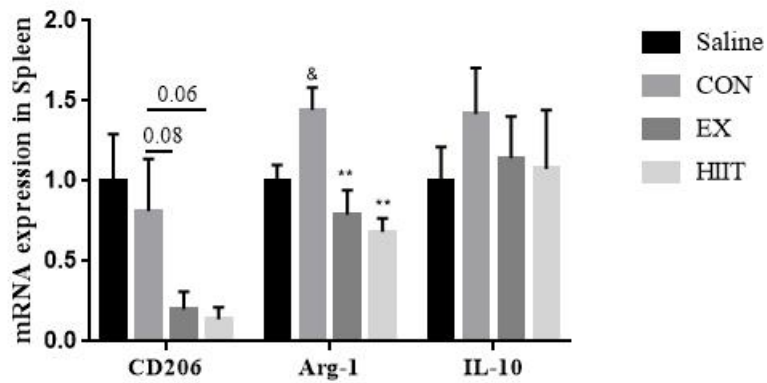

Figure S1: Effects of exercise on the polarization of TAMs in spleen. A: mRNA levels of M1 macrophage-related markers (n=8). B: mRNA levels of M2 macrophage-related markers (n=8). & represents a significant difference compared with the Saline group ($P < 0.05$). *, ** respectively represent a significant difference compared with the CON group ($P < 0.05$), ($P < 0.01$).

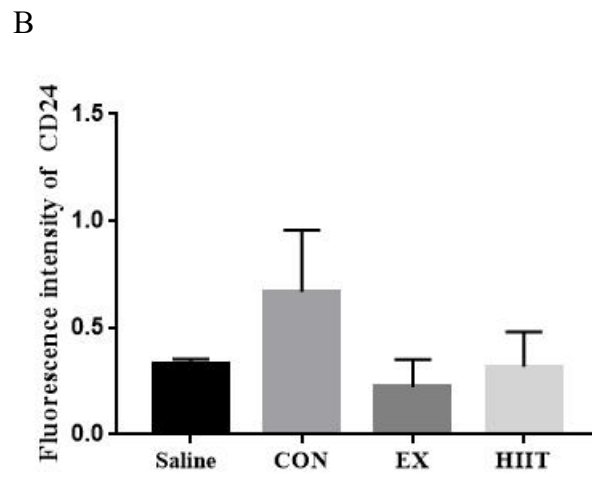

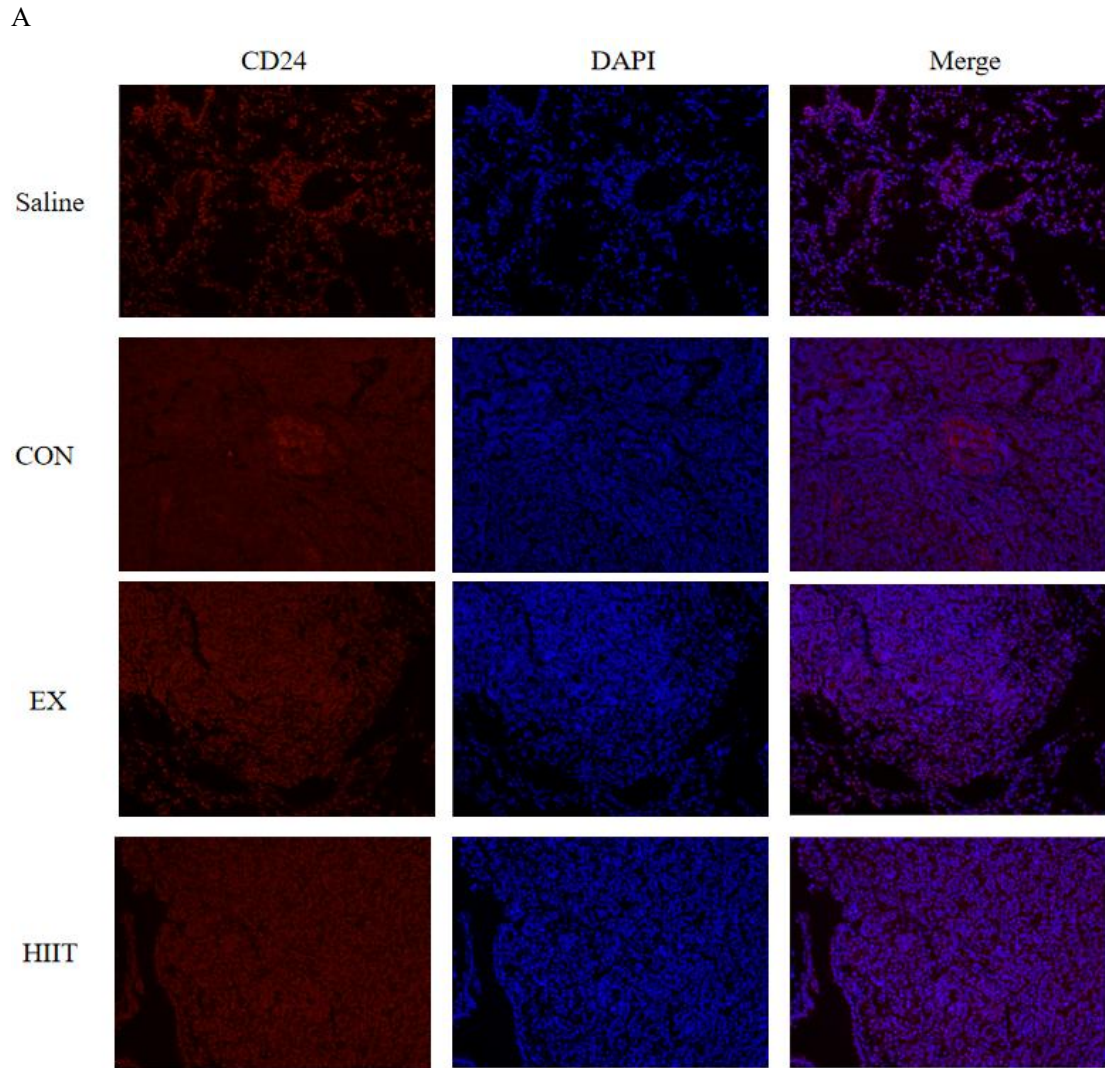

Figure S2: A: Immunofluorescence staining of CD24. B: Fluorescence intensity statistics of CD24 immunofluorescence staining (n=3).
