

1 **Supplementary figure 1. Differential gene expression analysis among LRG**  
 2 **molecular subtypes.** (A) Volcano plot analysis of differentially expressed genes among  
 3 LRG molecular subtypes. Differential thresholds:  $|\text{fold change}| \geq 2$  and  $p.\text{adjust} < 0.05$ ,  
 4 with red indicating upregulated genes and blue indicating downregulated genes. (B, C)  
 5 KEGG and GO enrichment analyses of differentially expressed genes associated with  
 6 LRG molecular subtypes.

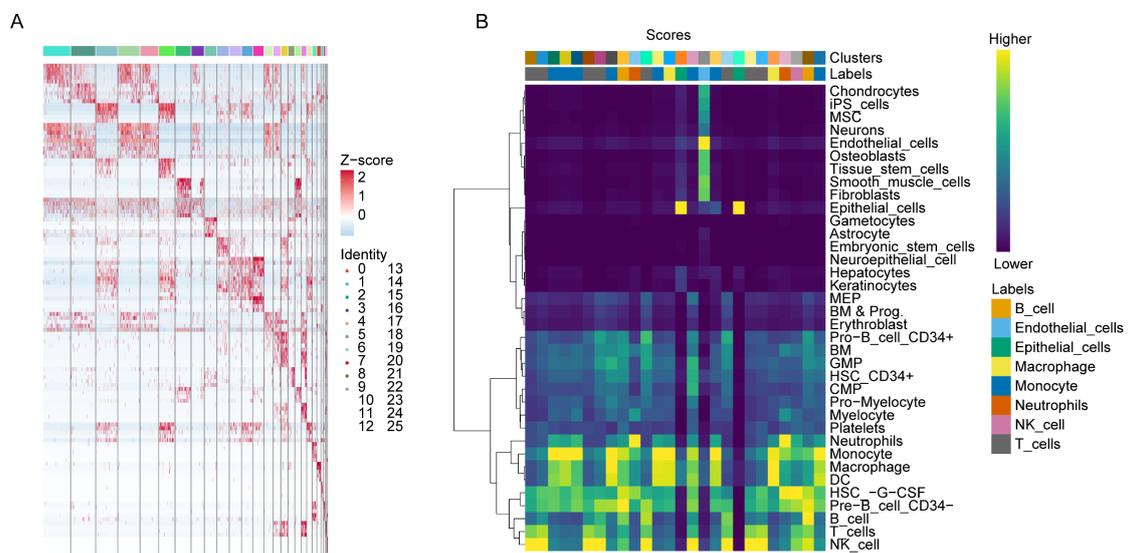

7  
 8 **Supplementary figure 2. Analysis of the potential correlation between**  
 9 **clinopathological characteristics and the LRG scoring system in LUAD.** (A-C)  
 10 Differential expression analysis of LRG scores across clinicopathological subgroups.  
 11 (D) Correlation analysis between LRG expression profiles and clinicopathological  
 12 characteristics. (E) Correlation analysis between the LRG scoring system and  
 13 clinicopathological characteristics. (F) Expression analysis of the LRG signature across  
 14 different clinicopathological characteristics.

15

16

17 **Supplementary figure 3. Cell type identification based on single-cell sequencing**  
 18 **data.** (A) Expression profiles of marker genes across different molecular subgroups.  
 19 (B) Cell type identification using the SingleR annotation algorithm.
